Monster Bud Boost Pack

Sufficient for cultivating 2 plants

The perfect liquid addition to **Monster Bud Mix**. It ensures a faster start to flowering, more compact and harder fruits, better resistance to pesticides, and a sweeter product.

Ingredients: Natural sugars (molasses), vitamins, vegan trace elements, amino acids, beneficial bacteria, enzymes, kelp, humic acids, and food-grade minerals.

Just 5 easy steps!

1. Put water in your reservoir
2. Add PK 13-14 and mix thoroughly
3. Add X-cel and Vitasol, mix thoroughly
4. Adjust pH to 6.0
5. Ready to water your plants!

MY WAY TO GROW

Even more growth and flowering?

To get even more return from your crop you use the substrate **Bio Soilmix** and the stimulators **Silution** and **Roots** in addition to the **Monster Bud Boost Pack** and **Monster Bud Mix**. For the ultimate growth and flowering!

Silution For the ultimate flower

Silution is a plant strengthening stimulator based on stabilized silicic acid and fulvic acid. Silution stimulates nutrient uptake, defense against viruses and infections and results in more dry weight.

Roots More roots, more flowers

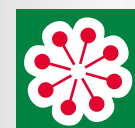

Roots contains high quality ingredients which ensures better and faster root development, a better food absorption, a higher stress resistance, a more effective use of nutrients and a higher yield in all tested crops. A strong root system results in more and bigger flowers and a higher yield.

Bio Soilmix The best nature has to offer

Is an excellent pre-fertilized organic potting soil. This mix is of a sublime quality and keeps its quality and airiness for a long period. This Soilmix is free of chemicals and animal by-products.
